

Golledge

Impeccable timing since 1990.

COLLEDGE 1990 — 2020

Impeccable. Timing since 1990.

From the very beginning Golledge Electronics has been created and developed according to our desire to look after every detail of your frequency product needs.

From free samples for prototyping engineers, through to priority delivery and meeting 99% of rescheduling request for projects in full production, through to protection from end-of-life via our buffer stocking solutions, we strive to offer the service that you want – the very best.

For 30 years we have been diligently caring about every detail of our service and we never stop striving to offer the best solutions we can, to make sure you get everything you need from us, your frequency product partner.

Our Product Range.

Encompassing a full range of frequency control products, from 10.0kHz through to 2.6GHz

CRYSTALS

OSCILLATORS

VCXOS

TCXOS & VTCXOS

OCXOS

RTC MODULES

CRYSTAL FILTERS

SAW FILTERS

SAW RESONATORS

SAW DUPLEXERS

Our History and Facilities.

Creation and Culture

Incorporated in 1990, Golledge was created as a family-run business and remains so to this day.

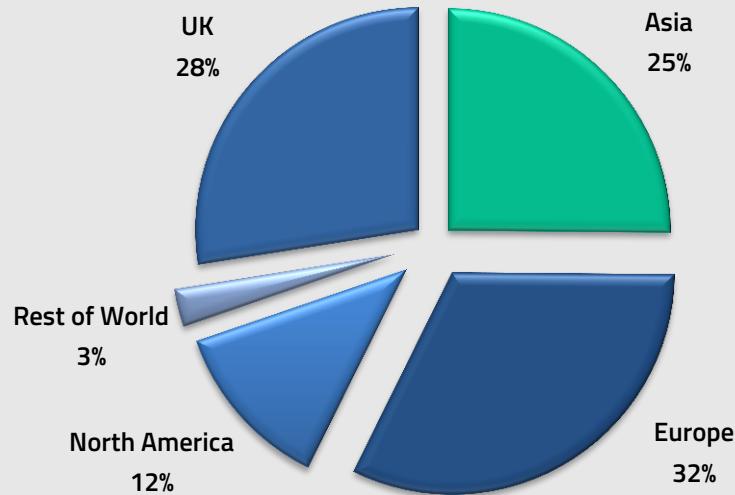

Our Locations

- Golledge headquarters and stocking hub based in Ilminster, Somerset has a capacity of over 2,500m² incorporating Sales, Admin, Stores, Quality, Marketing and Engineering departments.
- Two Taiwanese manufacturing partner facilities that produce Golledge brand product have a combined capacity of in excess of 130 million pcs per month for SM crystals, 80 million pcs per month for SM oscillators and 9 million pcs per month for TCXO products.

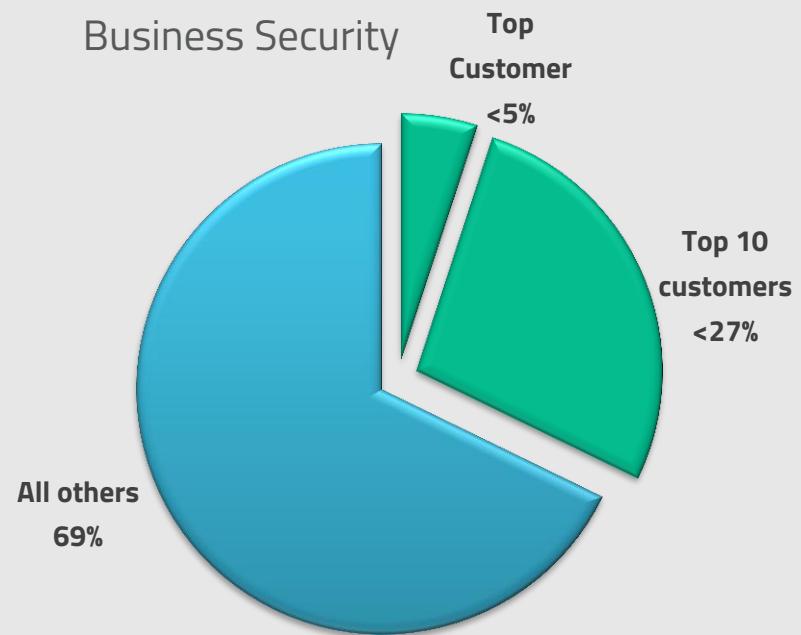

Our Range

Our product range encompasses all major frequency component groups including crystals, oscillators, TCXOs, VCXOs, OCXOs, RTCs, crystal filters, SAW filters, SAW duplexers and FEMs.

Global Business Profile

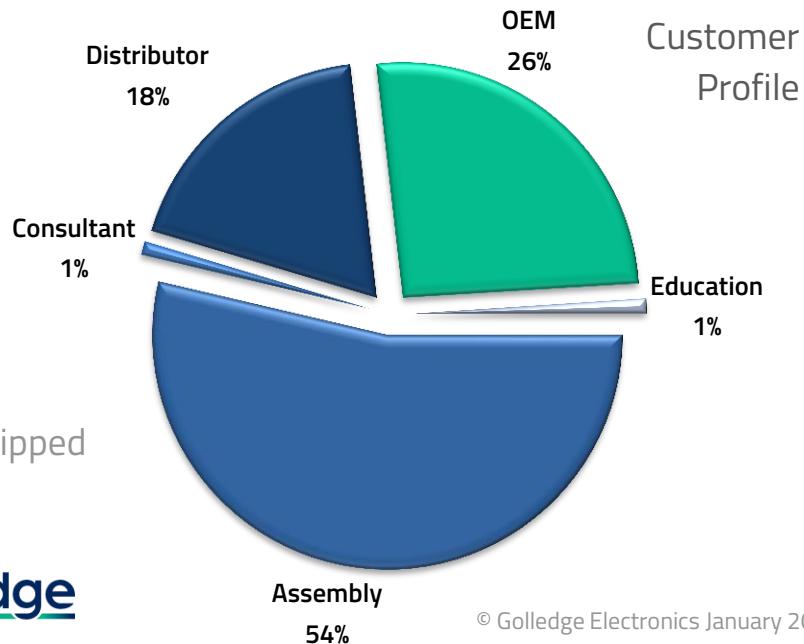

Business Security

Our Business Profile 2019.

Business Activity

- Over 5,900 quotes issued
- Over 5,300 orders placed
- Over 52,000 transactions completed
- World class failure rate of just 0.8 parts per million shipped

We offer a range of engineering solutions to benefit designers

From access to our UK engineer department for fast technical help through to free samples for registered projects

You can count on Golledge to save you design time by offering the best solution first time.

Solutions for Engineers and Designers.

Get costless prototyping with our 'free for designers' speciality

We offer free samples with free delivery to registered designers to help you get your product into production fast. We also offer CAD model libraries of our most popular parts to help with your design stage.

Get FAE support right from the start

If you need design expertise, or just want advice on the best pairing solution, we can help. Our expert in-house engineering team in the UK, led by our analogue specialist, means we can help with all RF technologies for both component and board level evaluation.

You can trust us to provide your whole frequency product need and have proven confidence in our products and service systems

We have over 20,000 developed product lines and counting, with cross referral support against all major industry manufacturers. We have a part failure rate smaller than one per million, and we are ISO 9001 certified meaning you can trust us to deliver the product you need with the service you want.

FF 12 ISO 9001:2015 Quality Management System

FF 13 ISO 14001:2015 Environmental Management System

Whether you're purchasing for a consultant designer, OEM or CEM organisation

We've got some commercial and logistical solutions that will save you time and money, and hopefully make you smile.

Solutions for Purchasers.

Take the risk out of your purchasing decision.

All Golledge products have passed stringent quality tests to ensure they meet our high standards and you can rest assured: we are ISO 9001 and ISO 14001 accredited and have full lot traceability on all products.

FF 12 ISO 9001:2015 Quality Management System

FF 13 ISO 14001:2015 Environmental Management System

We can rearrange deliveries to meet your JIT procedures and use priority shipping as standard to make sure you get your parts exactly when you need them.

Our innovative IT systems mean that we can be flexible when you need it most. We meet 99% of our customers' rescheduling requests and we are urgent about getting your order to you when you need it. We use priority shipping as standard meaning the longest it will take for your parts to be delivered is four working days, wherever you are in the world.

Project-based support for today's markets.

Our team's close-knit coordination means we excel at servicing multi-site and multi-company projects. We regularly work with the world's largest contract manufacturers, flexible account terms are available and we trade in four major currencies to minimise your currency conversion charges.

Your industry needs. Our Industry Strengths.

As frequency product specialists our business is truly global and our expertise and wide product range spans many industries:

Example Focus Industries

Harsh Environments
Industrial Automation
Military
Marine
Electronic Payment
Automotive
Smart Meters
Digital Health
Wearables
Audio
Asset Tracking

We stock specialist components

Including a dedicated automotive range, all fully AEC-Q200 qualified with PPAP documentation available, and specialist components able to withstand high shock, vibration and temperature for devices that need to withstand extreme conditions.

Our specialist sales engineers have average individual industry experience of over 15 years

We are experts in our field, knowing exactly what parts to recommend for your project. From smart meters to animal tracking device, down hole instrumentation to tyre pressure monitoring, our team can recommend the exact frequency component you need for your specific application.

Thank You.
