

UD info Corp. Company Profile

2021 Q1

UD info
www.udinfo.com.tw

Company Introduction

UD info Corp. is a total-memory-solution provider on NAND Flash products and DRAM modules, focusing on industrial, medical, automotive and other applications, which inquire high reliability and longevity in supply.

Company Background

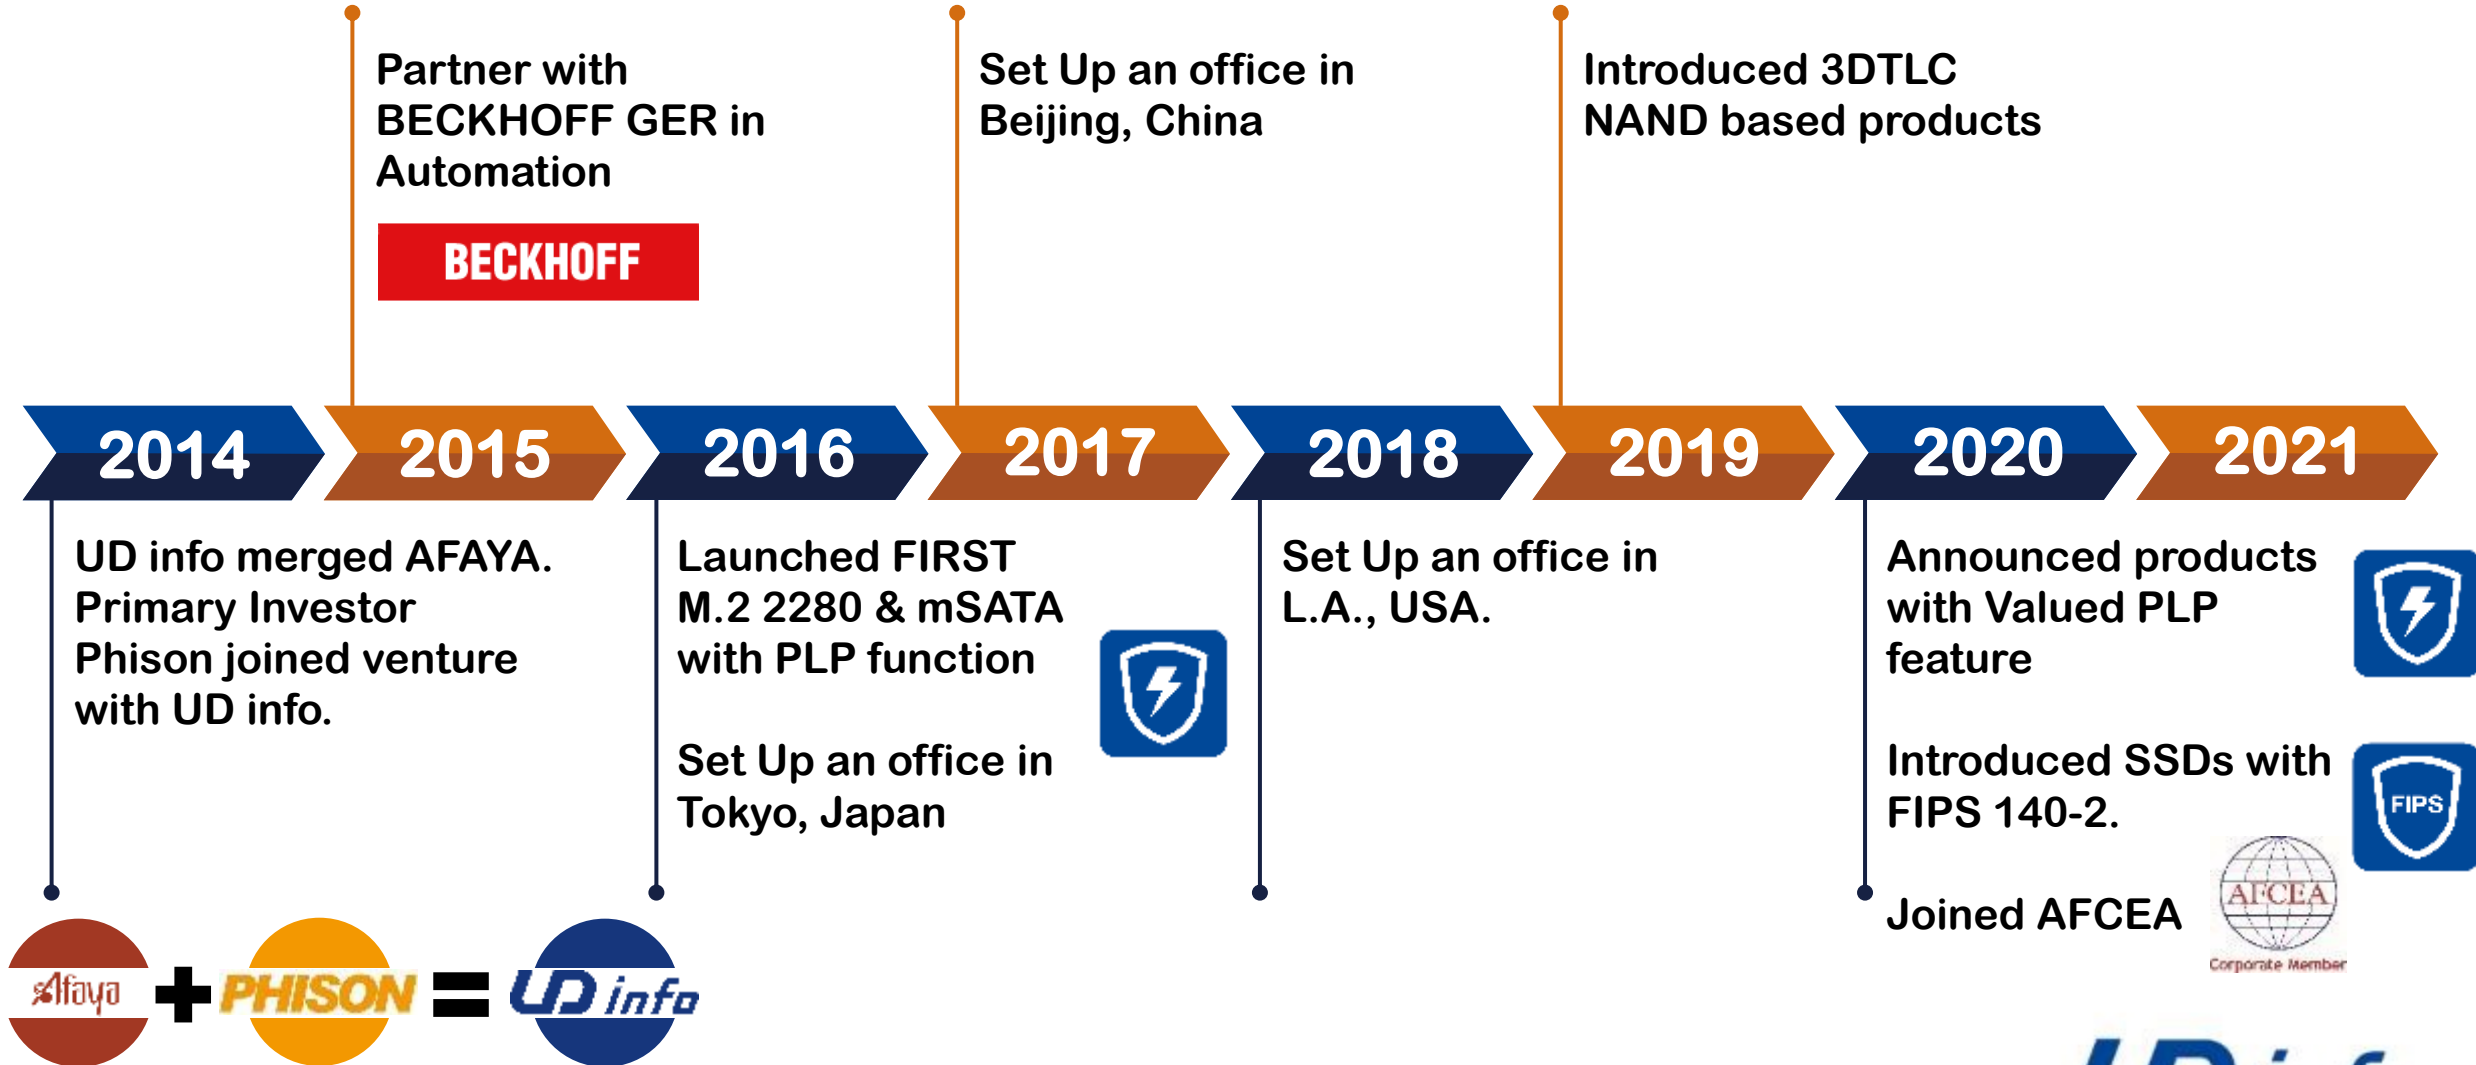

Gibson Chan Ph.D

- Founder & General Manager of UD info
- UCLA PH.D
- Vice President of Sales – Feiya
- Vice President of PM – ADATA
- Vice President – VIA Labs.

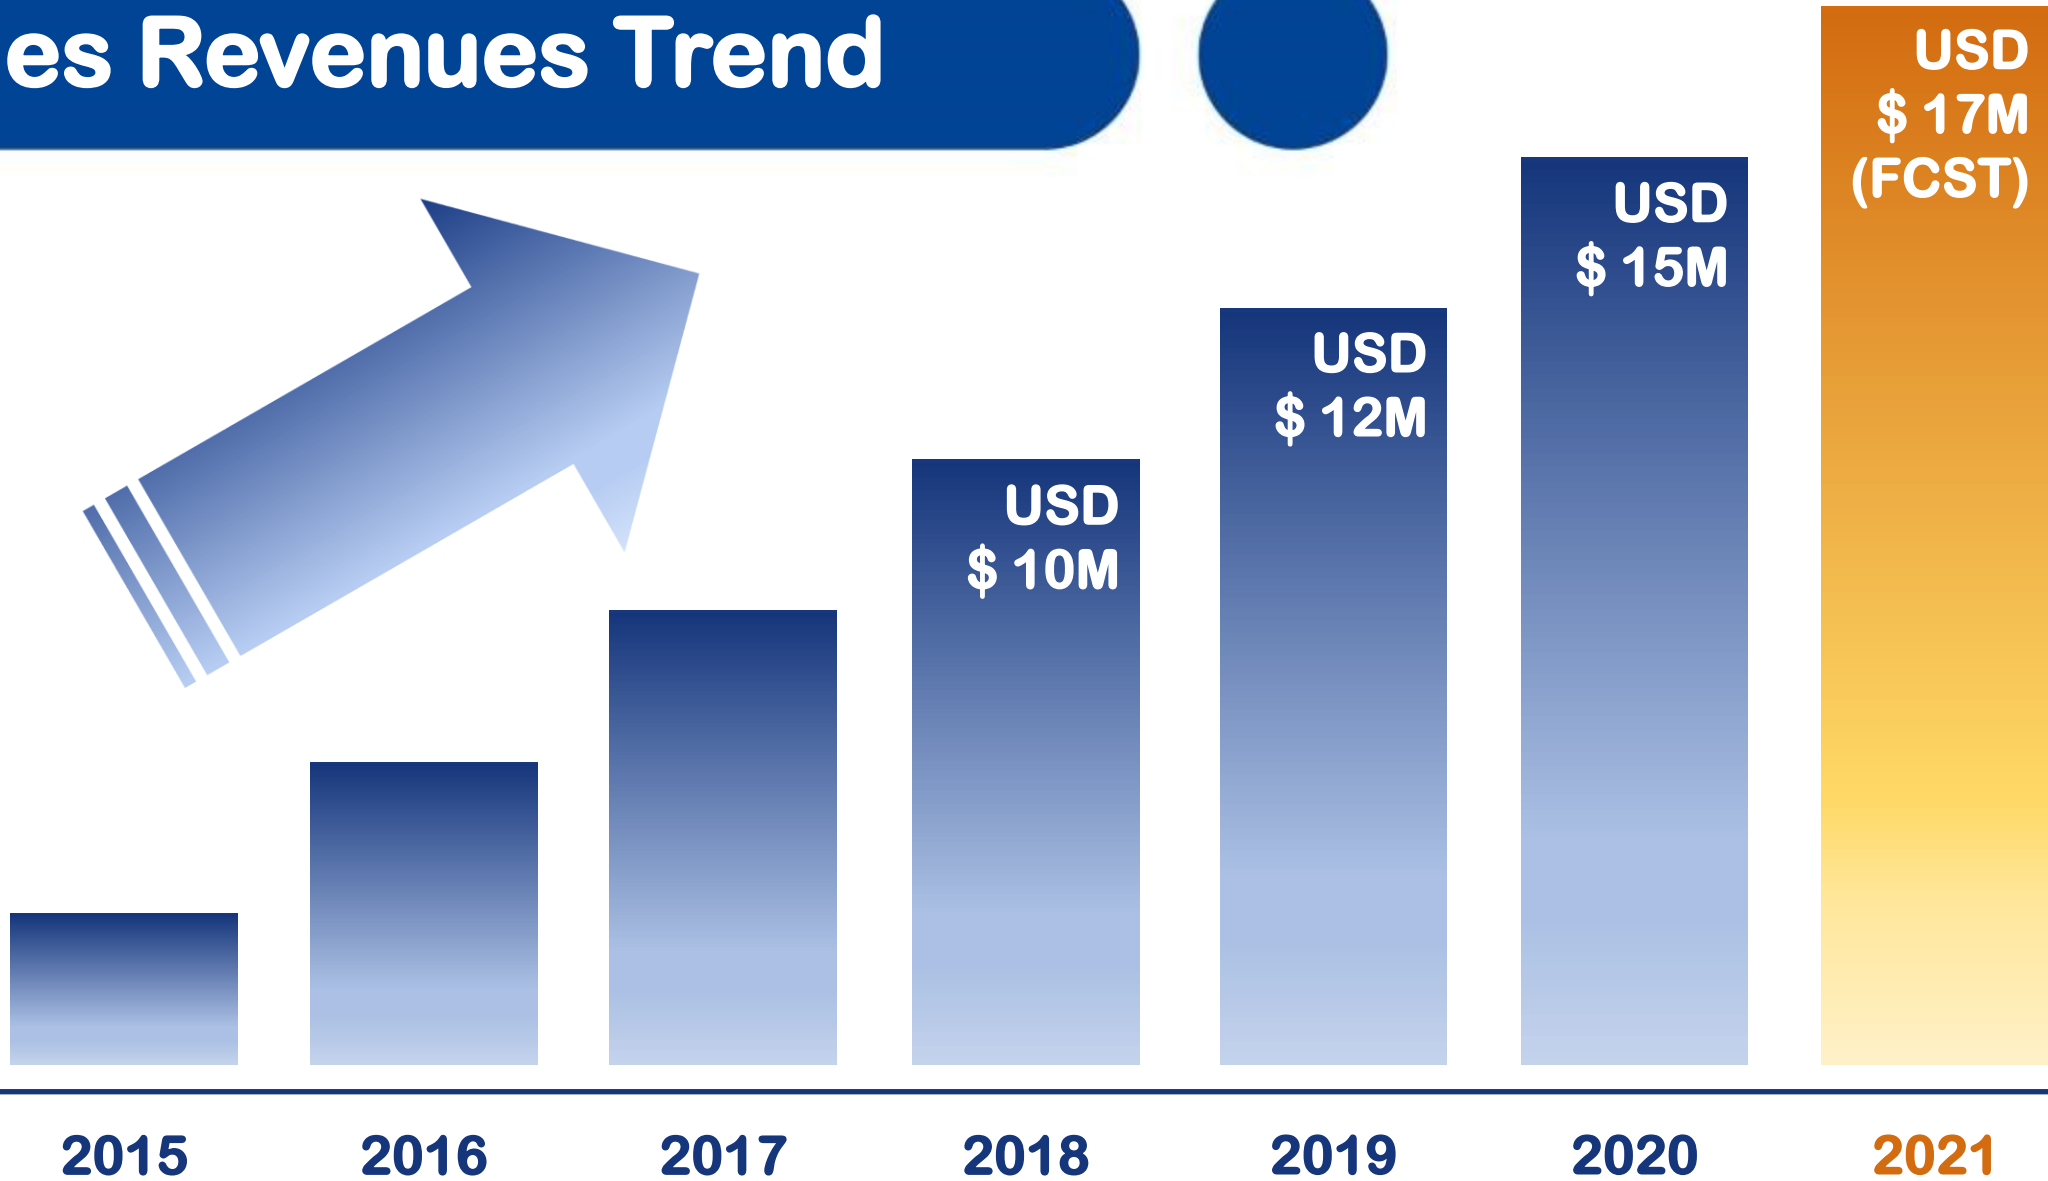

- Company Name : UD Info Corp.
- Industry : IPC Memory Storage
- Headquarter : New Taipei City, Taiwan
- Branches : Japan, USA, China
- Established : Year 2014

Company Milestone

Sales Revenues Trend

Strength

Variety Flash Options

Warranty

3+ Years Warranty & Made in Taiwan

Traceability

Complete Product Traceability for at least 5 Years

MOQ

No MOQ for Major Products

Quality Assurance

ISO9001
CE / FCC / RoHs

New Product Development

Complete Product Traceability for at least 5 Years

Fixed BOM

Fixed BOM & Setting are recorded & traceable for at least 5 years

Multiple Choice

More Than One Suggested Solutions can Support Customers' Demands

Trusty Strategic Partners

Stable Supply
Resources

New Products

Valued PLP Solutions

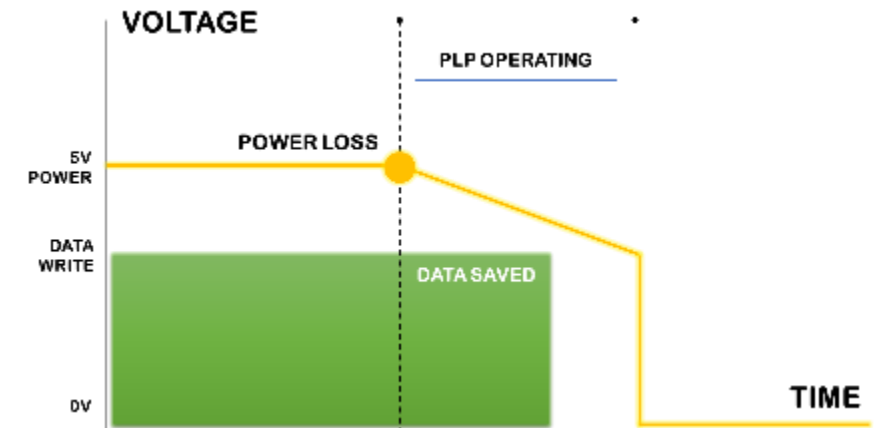

UD info Valued PLP (Power Loss Protection)

- No external DRAM
- No need to Pump Up to High Voltage
- Exclusive FW with great performance.

2.5" SATA	mSATA	CFAST	M.2 SATA 2280
Up to 2TB	Up to 1TB	Up to 512GB	Up to 2TB
0 ~ 70 c & -40 ~85 c			
3DTLC & 3D pSLC are available			
READY	READY	READY	Q1, 21'

FIPS 140-2 SSD

- UD info Flash memory products which can correspond **FIPS US government standard**. (Federal Information Process Standard)
- Applied on, **2.5" SATA SSD, M.2 SATA 2280 & M.2 NVMe 2280** products
- **Security Label** is performed on 2.5" SATA SSD
- **Conformal Coating** is implement on M.2 SATA 2280 & M.2 NVMe 2280 SSD.

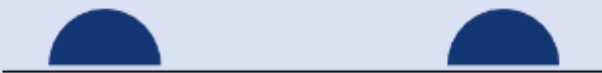

Special Features

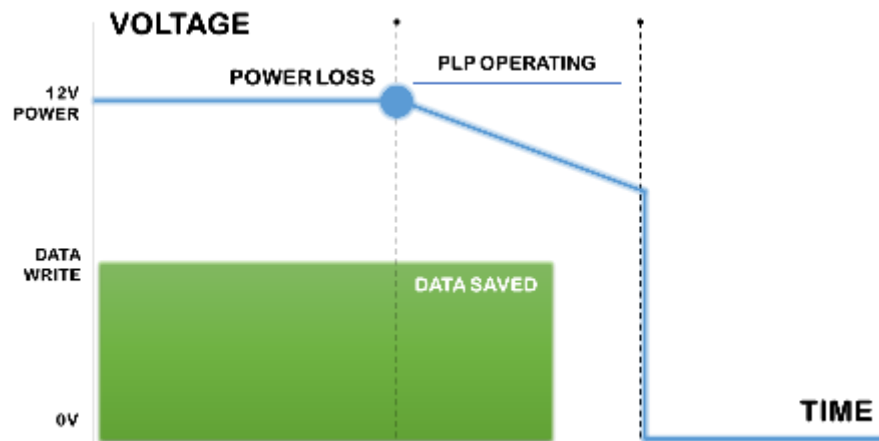

Pseudo SLC (pSLC)

pSLC

NAND Types		Structure	Reliability (P/E Cycles)	Cost
2D	SLC		60000	
	pSLC		30000	
	MLC		3000	
3D	TLC		3000	
	pSLC		30000+	

- pSLC is an Ideal Alternative Solution provides **Reliability & Cost Efficiency**, is perfect for **Heavy Write Application with Great Performance**.
- Base on **MLC or 3D TLC Flash** to simulate SLC Performance.
- The capacity of 3D pSLC is **¼ of 3D TLC**
- Reliability of 3D pSLC reaches **30K & more P/E cycles**

PLP Solutions

Power Loss Protection

Able to Protect System and Data

Yes

- Need to Pump Up voltage to 12v or higher
- Use High-Voltage Capacitors to Backup to NAND

High

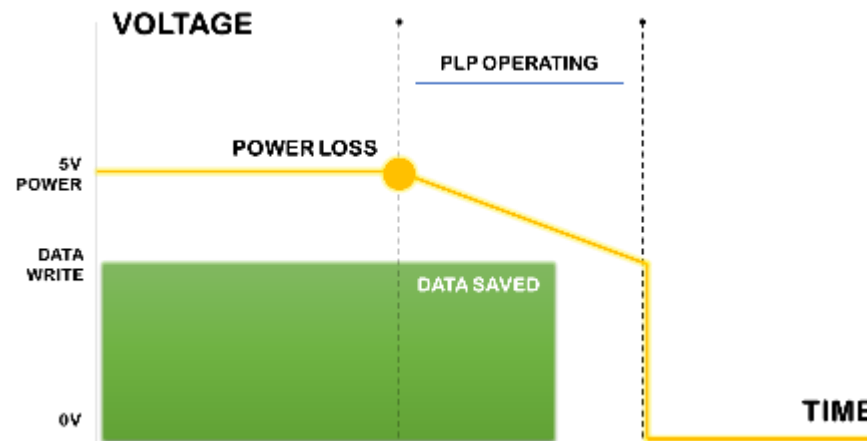

2.5" SATA / M.2 SATA 2280 / mSATA

Basic
Concept
External
DRAM

UD info
Solutions

Valued Power Loss Protection

Able to Protect System and Data

No (internal RAM)

- No need to Pump Up to High Voltage
- Use Low-Voltage Capacitors to Backup to NAND

Lower

2,5" SATA / M.2 SATA 2280 / mSATA / CFast

Opal / AES (Security Encryption)

- Both Opal & AES protect the confidentiality of stored user data against **unauthorized access** once it leaves the owner's control.
- OPAL / AES Hardware Encryptions are applied on **SATA interface & PCIe interface SSD.**

Quick Erase & Write Protect

- Quick Erase :

- Hardware Push Button or Software GPIO Control
- choose from Erase All or Erase Data to protect data.
- Erase All Data, Tables and Hidden Area.

Quick Erase Button

- Write Protect :

- Read Only.
- Hardware switch or Software GPIO Control.

Write Protect Button
